

Caribou Chronicles

Giving you the *Edge* in Business

SUMMER 2026 NEWSLETTER

Time On The Run

Time On The Run is our brand-new, in-house timesheet app, which is currently in beta mode. If you are interested in being an early adopter, let us know!

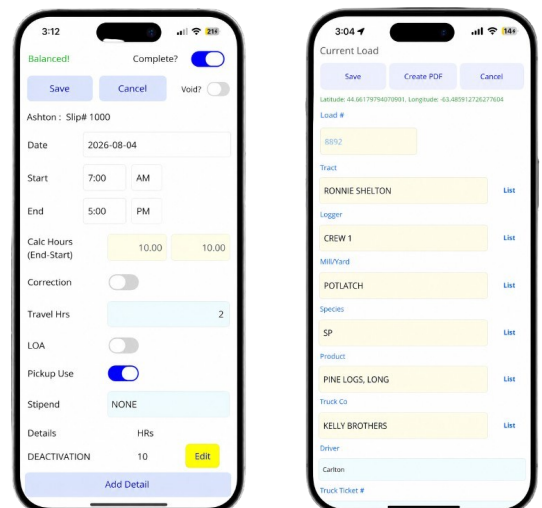

This mobile app is “device-agnostic”, so it can be used on either an Android or Apple device.

Unlike our E-Time, Time on the Run works offline. Timesheets are stored on the device and then sent once the device reconnects to Wi-Fi or cellular data. Approvers still use the Web-Based E-time Approval portal, but the individual employee app can be installed directly on either Android or Apple phones.

To watch a video on how it works, click this link: [Introducing: Time On The Run](#)

Loads On The Go

Historically, our users have chosen between deploying a mobile load entry app either all on Android devices or all on Apple tablets or phones. We have recently introduced a “device-agnostic” version called “Loads On The Go.” It is currently in “beta” mode, so if you’re interested in being a beta user, let us know.

Caribou Software FRA Feature

Early in the year, Caribou and its products were featured in a Forest Resources Association (FRA) industry article highlighting its role in helping companies “Close the Loop” across the supply chain. From digital load tickets in the woods to mill-side weighing, scaling, and payment, the article showcases how Caribou improves efficiency, transparency, and data accuracy for contractors, truckers, landowners, and mills. It also highlights real-time data sharing, GPS tracking, and modern tools replacing outdated systems.

Version 5.3.8

Logger’s Edge Version 5.3.8 is now available, bringing powerful enhancements to simplify tract and rate management. You can now view detailed Rate History to show who added, edited, or deleted rates along with exact timestamps for each change. New color coding highlights rates that have been used by calculators and rates tied to posted statements. These updates are part of a broader set of improvements designed to enhance clarity, accountability, and day-to-day efficiency. [Here is a video playlist that highlights some of the key features.](#)

FEATURED CARIBOU CLIENTS

Oregon Trade Show

One of the highlights of trade shows is always the chance to meet our clients in person. We had a great time connecting at our Oregon booth with Chehalis Valley Timber, Inc.—thanks for stopping by and spending time with us.

Chehalis Valley Timber is an Oregon company that uses our Logger's Edge software hosted in a Cloud environment, along with our Suzie Logger—a mobile ancillary app that allows their crews to enter digital loads while in the woods.
